

AYESHA LAKSHAN

DevOps Engineering Intern

Portfolio | LinkedIn | GitHub | ayeshalakshan00@gmail.com | +94-70-504-9567 | Medium

Summary

DevOps-focused ICT undergraduate with hands-on experience in CI/CD automation, Docker, Kubernetes, Terraform and Microsoft Azure cloud deployments. Skilled in Linux environments, Git-based workflows, and infrastructure automation using tools like Jenkins and GitHub Actions. Familiar with system monitoring, storage, and backup fundamentals. Passionate about building reliable, scalable systems and eager to contribute to cloud-based and DevOps-driven environments

Technical Skills

- **DevOps & Cloud Technologies:** Linux, Microsoft Azure, AWS (basic), Docker, Docker Hub, Kubernetes, Jenkins, Terraform, GitHub Actions, SonarQube, Grafana (basic), Nginx Ingress, Minikube
- **Operating Systems:** Linux (Ubuntu, CLI, basic system operations), WSL2, Windows
- **Networking:** HTTP, DNS, SSL basics
- **Storage & Backup:** NAS vs SAN, Backup types (Full, Incremental, Differential), Data Recovery Basics
- **Programming Languages:** Bash scripting, Python, PHP, Java, JavaScript
- **Version Control:** Git, GitHub
- **Concepts:** CI/CD, Infrastructure as Code (IaC), Version Control, Troubleshooting, Containerization, Orchestration, Deployment Automation, Cloud Deployment, Agile
- **Soft Skills:** Problem-solving, Team collaboration, Communication, Time management

Projects

CI/CD & DevOps Practice Project

November 2025 – December 2025

GitHub

- Built CI/CD pipeline using Jenkins, reducing manual deployment time by 60%, automating Docker builds and Kubernetes deployments for 2 microservices.
- Implemented code quality checks with SonarQube and managed Docker images via Docker Hub.
- Documented CI/CD pipeline steps, Docker image build process, Kubernetes deployment workflow, and troubleshooting notes.
- **Technologies:** Jenkins, GitHub, Docker, Docker Hub, Kubernetes, SonarQube, WSL2

CollabNote — Collaborative Note-Taking Web Application

March 2026 – April 2026

GitHub

- Containerized the React/Vite frontend and Node.js/Express backend using Docker.
- Deployed both services on local Kubernetes using Minikube, Services, Secrets, and NGINX Ingress.
- Configured Ingress routing for / frontend traffic and /api backend API traffic with MongoDB Atlas integration.
- Troubleshoot ImagePullBackOff, ErrImagePull, DNS, and Ingress issues using kubectl logs, describe, and health checks.
- **Technologies:** React.js, Node.js, Express.js, MongoDB Atlas, Azure, GitHub

EMS — Education Management System Web Application

December 2025 – February 2026

GitHub

- Developed a full-stack education management system for attendance, announcements, and exam results with secure role-based access.
- Provisioned Azure infrastructure using Terraform and deployed a

containerized ASP.NET Core MVC application to Azure App Service.

- **Achieved 5th place in the 12-hour HackMS competition** by delivering a fully functional software solution under strict time constraints.
- **Technologies:** C#, ASP.NET Core MVC, SQLite, Bootstrap, Azure, Docker

OneBlood — Online Blood Donation System

July 2025 – October 2025

GitHub

- Built a full-stack blood donation platform using React.js, Node.js, Express.js, and MongoDB with secure JWT authentication and role-based access.
- Designed a responsive Tailwind CSS interface and developed REST APIs for donor registration, blood requests, and hospital workflows.
- **Technologies:** React.js, Node.js, Express.js, MongoDB, JWT, JavaScript, Tailwind CSS

ServeLanka — Mobile Application

January 2026 – February 2026

GitHub

- Built a React Native mobile app connecting users with service providers through searchable posts, maps, and a home feed.
- Developed a secure Node.js/Express backend with JWT authentication and Firebase integration.
- **Technologies:** React Native, Node.js, Express.js, Firebase, JWT, TypeScript

Education

Bachelor of Information and Communication Technology (Hons)

Nov 2023 – Present

Uva Wellassa University of Sri Lanka

GPA: 3.39

Studied networking, web and mobile app development, database management, programming (Java, C, C#, .NET, React Native), and fundamentals of SDLC, Agile, Cloud Computing, and UI/UX.

Certifications

Linux Level 1 – KodeKloud Engineer

Docker Level 1 – KodeKloud Engineer

Jenkins Level 1 – KodeKloud Engineer

Kubernetes Level 1 – KodeKloud Engineer

Python for Beginners – University of Moratuwa

Web Design for Beginners – University of Moratuwa

Front-End Web Development – University of Moratuwa

Introduction to Career Skills in Software Development – LinkedIn Learning

Extracurricular Activities

Member – Uva Wellassa University Elle Team | Secured 5th place at HackMS'26 (12-hour hackathon)
